Intel on autopilot, submittals on rails

Wed 28 Oct · 60 min · Kev leads
Laptops open at the table
Pillar 03 · Accountability

The thread for the hour. Last week we said: be the consultant, with one number, one observation and one recommendation on every call. Today we make the intel arrive by itself every morning, and we make the submittal prove the match on paper.

Run of show

60 MIN

TIME	BLOCK	YOU LEAVE WITH
0:00	1 · Recap of 21 Oct	What we left on the table
0:08	The Name Game · pen, 5 min	Your market and client named: it feeds the sweep
0:13	2 · Construction news sweep	A scheduled sweep, run once at the table
0:30	3 · Must Do submittal packet	Crelate in Claude set up, one draft packet built
0:55	4 · Wrap	Three commitments, written down

1 · RECAP OF WED 21 OCT (8 MIN)

BLOCK LAST WEEK	WHAT WE DID	ASK THE TABLE
Crelate best practices	Laptops out, one board standard	Is your board fix done? Only active JOs in the job columns, leads in Leads / Buckets
Precon vs estimating	Skimmed	Quick quiz, right column
Become the consultant	Not drilled	Today's jump-off
Market numbers (ENR 52, ABC 8.7 months, data centers +57%, 42% short on workers)	Read, not used	Who used one as a call opener?
The Name Game	Handed out	We play it now (page 2), then it feeds the sweep

60-second precon quiz

KEV READS

1. "They price hard-bid CDs and run sub bids." Estimator or precon? ***Estimator.***
2. "They build budgets at SD and DD and sit in owner meetings." ***Precon.***
3. "A precon manager who only does takeoffs is a ___." ***Estimator.***

THE BRIDGE INTO TODAY

> **"Last week I asked you for one number, one observation, one recommendation on every call. Nobody has time to dig for that between dials. So Claude digs for it every night, and you walk in to three talking points."**

2 · WHY A NEWS SWEEP (TALKING POINTS)

- **News is a reason to call.** An award means hiring in 60 to 90 days. A new office means a leader to hire. A layoff or lost bid is the best week to call that firm's people. A leadership move opens a seat.
- **It makes you the consultant.** "Here's what we're seeing in your market this month" only works if you know.
- **It feeds the RP count, it doesn't replace it.** Every item you act on becomes RPs logged in Crelate. Not logged, didn't happen.
- **Your market only:** your states, sectors, top five firms and clients.
- **Open the link before you quote a number.**

The Name Game, *know the names, own the conversation*

0:08 · 5 minutes, pen only
Then every Friday as the warm-up
Your top 5 firms feed the news sweep

Why it makes us better conversationalists. Credibility on a call comes from specifics. "I just spoke with [name], who runs precon at [firm], about [project]" earns the next question; "I work with a lot of GCs" doesn't. Fill in your market from memory first, then check the depth chart and fill the gaps in a second colour. The gaps are your homework.

My market

NAME IT:

TOP 5 FIRMS I RECRUIT FROM	PRECON OR OPS LEADER THERE	ONE LIVE PROJECT

WHO JUST MOVED (AND WHERE)

My client

NAME IT:

PEOPLE WHO DECIDE	WHAT THEY CARE ABOUT THIS QUARTER

THEIR THREE BIGGEST COMPETITORS FOR TALENT

ONE NAME I'LL DROP ON A CALL TODAY, AND WHY IT MATTERS TO THEM

Rules: no comp, no private details, no client names in front of other clients. Names and roles only. A name you can't place in a project doesn't count.

Set up your construction news sweep

0:13 to 0:30 · laptops
Fill the brackets from your Name Game sheet

Paste this into a new scheduled task

THE PROMPT

```
Every [weeknight at 9pm Pacific / Sunday at 6pm Pacific], run my construction news sweep. I
am a recruiter at Eden Partner Group, an executive search firm for commercial construction. I
use this to find reasons to call and talking points for client and candidate calls.

My market:
- States and metros: [e.g. South Florida, Texas, DC and Baltimore]
- Sectors: [e.g. data centers and mission-critical, healthcare, high-rise, multifamily]
- Roles I recruit: [e.g. precon managers, estimators, PMs, supers, MEP leaders]
- Firms I recruit from: [your top 5 from the Name Game]
- Firms that are our clients (never recruit from them): [Kev reads the list]

1. Search the web for news from the last [24 hours / 7 days] only: project awards and
groundbreakings, GC and CM contract wins, new offices and market entries, leadership hires
and departures, layoffs and lost bids, mergers and acquisitions, and new reports on backlog,
spending, costs or labor (ENR, ABC, AGC, Dodge, ConstructConnect, the Business Journals,
local press).

2. Give me the top [5 / 10] items for my market, most useful first. For each:
   - Headline, date, and the source link
   - Why it matters for hiring, in one line
   - Who to call: the role at the firm (e.g. "VP Precon at <firm>"), never a phone number or
email
   - One talking line I can use on a call, under 25 words

3. Then give me:
   - "3 numbers this week": three market numbers, each with source and date
   - "My intel line": one number, one observation and one recommendation I can give my top
client this week

Rules:
- Every item has a link and a date inside the window. If you can't find a date, leave it out.
- If a firm on the client list appears, mark it "Client: don't recruit" and use it only as
client intel. Never mention one client's news in a line meant for another client.
- Moss is a client: referral asks only. Baker is a client: mark "Client · discreet".
- No personal details about anyone: no age, family, health, pay or home location.
- Never send, post or email anything. Just give me the brief.
- If nothing new is worth calling about, say "quiet night" in one line and stop.
```

Setup

12 MIN

1. Open Claude (app or claude.ai). Turn on **web search**. Optional: **Google Drive**, to save each brief to your folder ***04 Autopsies and notes***.
2. Open **Scheduled tasks**, new task, name it "Construction news sweep".
3. Set the schedule from the table below. Never Saturday.
4. Paste the prompt and fill the five lines in brackets.
5. Hit **Run now** once, here at the table.

NIGHTLY OR WEEKLY

	NIGHTLY	WEEKLY
When	Weeknights 9pm PT	Sunday 6pm PT
Window	Last 24 hours (Monday covers Fri to Sun)	Last 7 days
Best for	A live, competitive search	Building a book, BD calls
Length	Top 5	Top 10 plus 3 numbers

Start: nightly if you're on PB South or Triton, weekly for everyone else. Switch after two weeks if you want.

THE DRILL · 5 MIN

Read one item from your first run out loud and turn it into an action: **"That's three RPs to <role> at <firm> in Power Hour tomorrow."** Kev picks the best line in the room.

The Must Do submittal packet

0:30 to 0:55 · laptops
Nobody sends anything today

Talking points

KEV · 5 MIN

- **Why:** clients want better quality, better match and more references. The packet shows the match before they read the resume.
- **No Must Dos, no scorecard.** Every JO gets 7 to 10 from the intake call. If the client has none, we draft them and get approval first.
- **Kev reads every packet before it goes.** Hand it over with "Review before it goes to the client." Kev sends.
- **Pay:** desired only (base, bonus, vehicle, PTO). Never current base unless Kev says so.
- **Log the submittal in Crelate** after it goes. That's where the scorecard counts it.

THE PACKET, IN ORDER

#	PART
1	Eden cover page: title, years, location, desired pay, availability, interviewing elsewhere, concerns
2	Must Do scorecard: each rated meets, partial or gap, one line of evidence
3	Original resume, untouched
4	References (consent line) and screening notes

A · Crelate in Claude

ONCE · 10 MIN

1. Get **your own** Crelate API key (account settings, or Kev issues one).
2. Open **claude.ai/code**, start a session on `EdenExec/Agent-Builder`.
3. Environment settings: add a secret named exactly `CRELATE_API_KEY`. Under network access allow `app.crelate.com`. Never paste the key in the chat.
4. New session: "Read projects/recruiter-desk/crelate-in-claude.md and use Crelate read-only."
5. Test: "What did I log this week: calls, submittals, first interviews?"

AFTER CLAUDE HANDS YOU THE DRAFT

1. Fill the gaps with the candidate: desired pay, availability, reference consent.
2. Run it again without `--draft`. It refuses until the checklist passes.
3. Hand the PDF to Kev. Kev reads it and sends.
4. Save to Drive: ***Submittals / Client / JO / Candidate***. Log the submittal in Crelate.

B · Build a packet

PER CANDIDATE

```
Build a submittal packet for [candidate name] on
the [client] [role] JO.
1. Read projects/team-hub/submittal-
packet/workflow.md and follow it.
2. From Crelate, read-only: pull the candidate's
title, years, location and past states, their
resume attachment, and my screening notes on this
JO.
3. Use the approved Must Dos for this JO: [paste
them, or the file in projects/team-hub/must-dos/].
4. Fill packet-template.json outside the repo, rate
each Must Do meets, partial or gap with one line of
evidence from my notes, and run npm run submittal -
- <file> --draft.
5. Tell me exactly what's missing (desired pay,
availability, reference consent, any Must Do with
no evidence) and hand me the PDF.
Never commit the packet or the filled JSON. Desired
pay only. No other client's name in the packet.
```

THE DRILL · 10 MIN

Pick one live candidate you've screened. Build a **DRAFT** packet and the list of what's missing before the wrap.

Rollout and wrap

0:55 · 5 min · pen
Note taker uploads the notes

Packet rollout

DATES

WHEN	WHAT	WHO
Today, Wed 28 Oct	Crelate in Claude set up; one draft packet each	Every recruiter, Kev at the table
By Fri 30 Oct	Must Dos exist for every active JO you own (drafts go to the client for approval)	Lead recruiter per JO
From Mon 2 Nov	Every submittal goes as a packet. No packet, no submittal	Everyone
Every Friday	Submittals logged in Crelate match packets in Drive; packets per submittal on the scorecard	Nick, Dean
Certification	"Submittal certified": three packets Kev approves with no changes	Kev signs off in person

BEFORE IT GOES TO KEV

- ☐ Must Dos are the approved list for this JO
- ☐ Every Must Do has a rating and one line of evidence
- ☐ Desired pay only, marked desired
- ☐ Resume is the original, unedited
- ☐ Reference consent recorded
- ☐ Concerns filled honestly ("none known" only if true)
- ☐ Client name matches the JO; no other client named

Wrap · my three lines

READ THEM OUT

SWEEP

My sweep is scheduled for (nightly / weekly) _____ and I'll open a call tomorrow with item _____

PACKET

My first packet goes to Kev by _____ for _____ on the _____ JO

CONSULTANT
